

Webinar Announcement

UNDERSTANDING WATERSHED SYSTEMS THROUGH COORDINATED OPEN SCIENCE

Help shape a new vision for integrated watershed science by joining us for a series of discussion-based webinars that will inform an upcoming workshop from the U.S. Department of Energy. The webinars build from a webinar on November 26th, 2018, and focus on more detailed themes. (A recorded presentation from the November webinar can be found here: https://zoom.us/recording/share/RnY4HiB30Xjd_18J26KJjWqHPI5EnZoIsGymM_wXcy6wIumekTziMw).

Dates and Times: All times in Pacific (US and Canada)

Computation: Jan 18th, 10-11 a.m.

Measurements: Jan 22nd, 10-11 a.m.

Cyberinfrastructure & Data Standards: Jan 24th, 12-1 p.m.

These discussions will provide venues to consult the scientific community on the challenges and opportunities associated with the workshop's goals ([click here for workshop information](#)). An introduction to the workshop's goals will be provided, followed by guided discussion.

These discussion-based webinars are open to all interested parties. Invitation to the in-person workshop (January 28-30, 2019) is not required to participate in the pre-workshop discussions.

The webinars will be hosted on Zoom. Please register to join us by following the links below, and feel free to register for one or all of the webinars.
